**Re: 2015 Technical Seminars**

Dear President,

The FIVB Technical Seminars programme is intended for technicians (with experience as Volleyball players and/or coaches) looking to improve their knowledge and competence of different Volleyball techniques. These seminars usually feature world-renowned Volleyball coaches and instructors, and involve players for practical demonstrations.

This year, following the course request deadline, the FIVB is happy to announce that 33 Technical Seminars are scheduled for 2015 between March and November. As listed in the FIVB's website, please find the list of all courses registered this year on the following link:

<http://www.fivb.org/EN/Technical-Coach/Calendar.asp?Year=2015>

We believe that a stronger family will naturally lead to more Volleyball, so in the spirit of innovation, it is our mission to continuously enhance FIVB's educational programmes and increase the impact such projects generate.

Thank you for being part of this.

Kind regards,

  
ARY S. GRAÇA F<sup>o</sup>  
FIVB President
